

"In Through the Back Door: Reaching the Majority World in North America" Presented to the Southeast Regional Evangelical Missioloigcal Society, Mid America Baptist Theological Seminary, Memphis, TN, March 14-15, 2008

By J. D. Payne¹

The region of the world known as North America contains much ethno-linguistic diversity. As the world's third largest continent, North America contains over a half a billion people. Though the United States and Canada are the two most popular countries serving as a magnet drawing immigrants from other parts of the world, peoples from across the globe continue to migrate to other North American countries as well.

By far the greatest need for the gospel today extends to those unreached peoples not living in North America. Any cursory examination of the world's unreached peoples reveals that they are concentrated in non-North American contexts. The Church must place a strategic priority on evangelism and church planting among such peoples. This paper is not written to diminish such work, but rather to suggest a complimentary approach to reach the majority world. Such a suggestion calls for global-thinking in our strategies.

Over the years, various color-coded maps have been used to display the percent of evangelicals comprising the nations of the world, with various color shades depicting

¹J. D. Payne is a national missionary with the North American Mission Board and Associate Professor of Church Planting and Evangelism at The Southern Baptist Theological Seminary. He is also the founder of www.northamericanmissions.org, a web-based resource for the multiplication of disciples, leaders, and churches throughout North America.

"reached" and "unreached" areas. Two of the best scales depicting evangelization used today are the Global Status of Evangelical Christianity Model (see Figure 1), developed by Global Research of the International Mission Board and the Joshua Project Progress Scale (see Figure 2).

Global Status of Evangelical Christianity Model					
((Status	Description No evangelical Christians or churches.			
	0	No access to major evangelical print, audio, visual, or human resources.			
Last Frontier	1	Less than 2% Evangelical. Some evangelical resources available, but no active church planting within past 2 years.			
Unreached	2	Less than 2% Evangelical. Initial (localized) church planting within past 2 years.			
	3	Less than 2% Evangelical. Widespread church planting within past 2 years.			
	4	Greater than or equal to 2% Evangelical			
	5	Greater than or equal to 5% Evangelical			
	6	Greater than or equal to 10% Evangelical			
	7	Unknown			

Global Status of Evangolical Christianity Model

Figure 1. GSEC Model³

Both of these resources are great blessings to the Church and should be used in the advancement of the gospel even though Global Research and Joshua Project are quick to note the limitations of these scales and their people group databases.

²Joshua Project uses "Least reached" and "Unreached" interchangeably to avoid giving a cut-and-dried impression that evangelization is complete. See "From 'On/Off to a Scale'," in *Missions Frontiers* 26 #6 (November-December, 2004), 9, or on-line at http://www.missionfrontiers.org/2004/06/PDFs/06-13.pdf; Accessed 3/11/08.

³International Mission Board, "Global Status of Evangelical Christianity; March 2008." Taken from http://www.peoplegroups.org/Downloads/2008-03%20GSEC%20Overview.pdf; Accessed 3/11/08.

The purpose of this paper is to make the argument that many of the world's unreached people groups (UPGs) reside in North America and that the North American Church needs to identify, understand, and develop appropriate global strategies for working with those UPGs to reach the Majority World with the Good News of God's love. Guided by the present databases from Global Research and Joshua Project, this paper will note:

- There are numerous UPGs living in North America.
- There are numerous people groups living in North America who by virtue of their geographical location, have been removed from official UPGs listings.
- There are hundreds of people groups living in North America with an unknown evangelical percentage, especially in Canada and the United States.
- There is a great amount of discrepancies between these two databases as related to North America.

Stage	Level	Level Description
	1.0	Status data unavailable.
Unreached / Least-Reached		Located where gospel is not generally available.
Least-Reached	1.1	Very few, if any, known believers. Adherents <=5%
	1.2	Evangelicals > 0.01%, but <=2%. Adherents <=5%.
	2.0	Status data unavailable.
Formative or		Located where gospel is generally available.
Nominal Church	2.1	Very few, if any, known believers. Adherents >5%
	2.2	Evangelicals > 0.01%, but <=2%. Adherents >5%.
	3.1	Evangelicals >2% but <=5%.
Emerging		Probable group of evangelical fellowships.
Church	3.2	Evangelicals >5%.
		Accelerating rate of new fellowships.
	4.1	Evangelicals >10% or
Growing		one evangelical fellowship per 10,000 individuals.
Church	4.2	Evangelicals >15% or
		one evangelical fellowship per 5,000 individuals.

Figure 2. Joshua Project Progress Scale⁴

⁴Joshua Project Progress Scale taken from http://www.joshuaproject.net/progress-scale-definition.php; Accessed 3/11/08.

Where is North America?

Geographers and anthropologists generally note that the southernmost country of North America is Panama; the northernmost country is Canada (Nunavut); the westernmost country is the United States (Aleutian Islands of Alaska); and the easternmost country is Greenland. When these four nations are taken together with Middle America, Caribbean, and a spattering of islands and territories, North America is composed of the following thirty-six lands:

Anguilla	Haiti
Antigua and Barbuda	Honduras
Aruba (Netherlands)	Jamaica
Bahamas	Martinique (France)
Barbados	Mexico
Belize	Montserrat (UK)
Bermuda	Netherlands Antilles
British Virgin Islands	Nicaragua
Canada	Panama
Cayman Islands (UK)	Puerto Rico
Costa Rica	Saint Kitts and Nevis
Cuba	Saint Lucia
Dominica	Saint Vincent and the
Dominican Republic	Grenadines
El Salvador	Trinidad and Tobago
Greenland (Denmark)	Turks and Caicos Islands
Grenada	(UK)
Guadeloupe (France)	United States of America
Guatemala	U.S Virgin Islands
	_

Table 1. Countries and Territories of North America

Why North America?

When compared to the other continents of the world, North America boasts of a very large evangelical population. There is absolutely no doubt that the greatest need for the gospel, new churches, and resources is found outside of North America. However, in the attempt to reach the majority world from solely outside of this continent, I believe the North American Church may be overlooking some significantly strategic matters:

- About the number of UPGs in North America representing the majority world
- About the strategic significance of equipping and partnering with reached majority world peoples to return to their UPGs living outside of North America
- About diminishing the significance of the role of the missionary and E-2 and E-3 forms of church planting in North America.

The 35,000 Feet Viewpoint

When flying over any given city at 35,000 feet, the observer is able to make out certain details of the city. Industrial parks, wooded areas, major roadways, bodies of water, center city districts, suburbs, and major sports stadiums are noted. However, until the plane descends to a much lower level, all significant details about that city go unnoticed. High altitudes are great for the big picture perspectives, but are of little help in truly understanding what is occurring at the street-level.

It is my fear that the North America Church is dangerously close, if not already there, to making a similar mistake in North America that Ralph Winter spoke against at Lausanne. It was at this global congress on world evangelization, that Winter called the evangelical community to recognize the unreached peoples of the world and the necessity for E-2 and E-3 evangelism and church planting, what he described as "the highest

priority." There are striking parallels between his words spoken in 1974 describing the attitudes of the churches toward non-North American missions and today's attitudes of the North American Church toward Her own context. Winter observed:

On the other hand, many Christians as a result have the impression that the job is now nearly done and that to finish it we need only to forge ahead in local evangelism on the part of the now worldwide church, reaching out wherever it has already been planted. Many Christian organizations, ranging widely from the World Council of Churches to many U.S. denominations, even some evangelical groups, have rushed to the conclusion that we many now abandon traditional missionary strategy and count on local Christians everywhere to finish the job.⁵

At a time when North America is the largest missionary sending continent on the planet (with the United States being the largest sending country), it is my concern that we have failed to recognize the priority of reaching the UPGs here (E-2 and E-3 church planting) and partnering with reached majority world people groups living in North America to return to their unreached peoples living outside of this continent with the hope of Christ.

In March 2008, the Pew Forum on Religion and Public Life released the results of the "U.S. Religious Landscape Survey," noting that evangelicals now comprise 26.3% of the U.S. population.⁶ Color-coded evangelization maps rightly designate the United States as over 10% evangelical. However, I fear that the North American Church has become content with the 35,000-foot viewpoint, and is blinded to the street-level

⁵Ralph Winter, "The Highest Priority: Cross-Cultural Evangelism," in *Let the Earth Hear His Voice: International Congress on World Evangelization Lausanne, Switzerland*, J. D. Douglas, ed., (Minneapolis, MN: World Wide Publications, 1975), 213.

⁶The Pew Forum on Religion and Public Life, "U.S. Religious Landscape Survey-2008," 5. For a full report of the study see http://religions.pewforum.org/pdf/report-religious-landscape-study-full.pdf; Accessed 3/11/08.

perspective; we do not understand the peoples living with us, and the necessity of E-2 and E-3 evangelism and church planting.

To be fair, the Church must have the high altitude perspective. The Church must know what is generally occurring within the countries of the world. With over six billion people, the Global Status of Evangelical Christianity scale and the Joshua Project Progress Scale are to be commended for use in Great Commission work. However, just as Global Research and Joshua Project are not content with the 35,000-foot perspective among the majority world nations, thus revealed by them reporting individual people group-level research, the data for North America's people groups must also be as accurate as possible. An examination of the present North American data from both Global Research and Joshua Project is very helpful, but is at times contradictory and inadequate.

Unseen North Americans

In his book, *American Mosaic: Church Planting in Ethnic America*, Oscar I.

Romo mentioned the "unseen Americans," those people in our midst "who are not identified, since they comprise less than 1 percent of the population in a census tract."

Several years earlier, Winter at Lausanne, referred to this problem as McGavran's notion of "people blindness," noting that this Great Commission malady, "seems more prevalent in the U.S. and among U.S. missionaries than anywhere else." It is typically only at a street-level perspective that the Church will see the unseen, recognizing that many of

⁷Oscar I. Romo, *American Mosaic: Church Planting in Ethnic America* (Nashville, TN: Broadman Press, 1993), 46.

⁸Winter, 221.

these invisible peoples are UPGs. The need for accurate and reliable data on North American people groups is very significant for multiplying churches throughout *both* North America *and* the rest of the world.

Research Methodology

The research supporting this paper draws heavily from two of the best databases on the planet, those of Global Research and Joshua Project. Both of these databases can be accessed on-line through search engines found at www.peoplegroups.org (Global Research) and www.joshuaproject.org (Joshua Project). Such incredible data is a gift to the Church and reflects years of difficult work among the approximately six billion people on the planet. Though this paper will address some of the concerns of these databases when studying North America, they are reflections of outstanding work and provide an outstanding starting point for understanding the peoples of North America.

After searching and gathering people group data for North America, I organized the data according to country and people groups. I was particularly interested in three categories.

First, I extracted and compared the data of the listings of North American UPGs from both Global Research and Joshua Project. When examining the data from Global Research, I looked for those peoples who were assigned an "unreached" status rating of 0-3 (see Figure 1), with all such peoples consisting of an evangelical presence of less than 2%. When examining the Joshua Project data, I extracted all peoples who were assigned an "unreached/least reached" level of 1.0-1.2 (see Figure 2), with all such peoples consisting of an evangelical presence of less than or equal to 2%.

Second, I wanted to know what people groups, simply because of their presence in North America, were removed from the UPG listings and categorized as "reached". Sifting through 11,571 people groups in the Global Research database, I collected the complete list of people groups, grouped them by "Population Entity Name" and extracted all of those who met the following criteria: 1) had a categorization of a 0-3 status rating in at least one country in the world (including North America); and 2) had a categorization of a 4-6 status rating in at least one North American country/territory.

I was able to gather similar data from Joshua Project with the help of one of their researchers. Following Joshua Project's Progress Scale, I requested data on the people groups who 1) had a categorization of 1.0-1.2 level in at least one country of the world; and 2) had a categorization of 2.0-4.2 in at least one North American country or territory as defined in this paper.⁹

Third, as a result of some preliminary research with the two databases, I quickly noticed that hundreds of North American people groups, especially those listed as "unreached" while living in non-North American countries, are categorized as having an evangelical percentage as "unknown." Global Research assigns such people groups with a status of "7" (see Figure 1) while Joshua Project records them with a progress level of "2.0" (in the reached category, see Figure 2). Because hundreds of people groups were found in the "unknown" evangelical category, especially those located in the United States and Canada, I had to draw attention to what quickly became one of the most important findings in this study.

⁹It should be noted that Joshua Project categorizes Central American countries with South America and not with North America and the Caribbean. Because of this difference, I had Joshua Project to search for the requested data in North America, Caribbean, and the specific Central American countries that I include as North America (see Table 1).

Unreached People Groups Living in North America

A comparison of the two databases reveals a significant discrepancy in both the total number of clearly identified UPGs living in North America and their locations.

Despite the fact that research of this nature is difficult, findings are always in flux, and some people groups can be identified by more than one name, there is a difference of 127 UPGs, a discrepancy much too large for effective global strategy.

Joshua Project identifies 113 UPGs living in North America. For a listing of these groups see Appendix 1. Table 2 shows their numbers according to the geographical area:

UPGs by Country, Joshua Project

Table 2. UPGs in North America, Joshua Project

Global Research identifies 240 UPGs living in North America (see Table 3). For a listing of these groups by name and status, see Appendix 2.

Table 3. UPG's in North America, Global Research

Strategic Implications

Though such conflicting numbers between the two databases must be resolved, the point is that there are a large number of UPGs presently living in North America. *Not only have the nations arrived on this continent, but also some of the most unreached peoples can be found in our backyards*. Again, the North American Church needs to heed the words of Winter spoken in 1974:

Are we in America, for example, prepared for the fact that most non-Christians yet to be won to Christ (even in our country) will not fit readily into the kinds of churches we now have? . . . Present-day American Christians can wait forever in their cozy, middle-class pews for the world to come to Christ and join them. But unless they adopt E-2 methods and both *go out after these people and help them found their own churches*, evangelism in America will face, and is already facing, steadily diminishing returns. You may say that there are still plenty of people

who don't go to church who are of the same cultural background as those in church. This is true. But there are many, many more people of differing cultural backgrounds who, even if they were to become fervent Christians, would not feel comfortable in existing churches. ¹⁰

Cross-cultural evangelism and church planting *must* become one of the priorities of the Church in North America. The North American Church *must* return to the apostolic nature of the church planter and define church planters more as missionaries and less as pastors. We must also stop conceptualizing church planting *primarily* along ethnic lines. At present, Anglos are to plant Anglo churches; Hispanics are to plant Hispanic churches; Asians are to plant Asian churches; and Africa-Americans are to plant African-American churches. E2 and E3 expressions of church planting must be emphasized among all believers regardless of ethnicity.

According to Joshua Project, some of the highest priority UPGs are residing in North America (see Table 4).

Name	Need Ranking	Location	Est. Population	Considered Unreached in North America?
Arab, Najdi Bedouin	92	United States	5,500	Yes
Tay, Tai Tho	91	United States	600	No
Arab, Saudi-Najdi	91	United States	5,500	Yes
Arab, Ta'izz-Adeni	90	United States	4,900	Yes
Berber, Arabized	85	United States	23,000	Yes
Parsee	85	Canada	26,000	Yes
Parsee	85	United States	76,000	Yes

Table 4. Joshua Project's Highest Need People Groups Living in North America¹¹

_

¹⁰Winter, 221, 222.

¹¹According to the Joshua Project web site, "The Priority-Ranking (or Need-Ranking) was developed to identify the people groups that have the greatest spiritual need and priority attention. The higher the ranking the greater the need. The maximum score is 100 points." Taken from http://www.joshuaproject.net/faq.php#ranking; Accessed 3/12/08. It should be noted that Global Research reflects different names and populations for these groups.

Also, according to Joshua Project, there are several UPGs with populations of 10,000 or more members residing in North America (see Table 5):

People Group Name	Country	Est. Population
Punjabi	Canada	828607
Jew, English Speaking	Canada	303477
Japanese	Canada	61473
Jew, Eastern Yiddish-Speaking	Canada	51789

Tatar United States 10160

Table 5. UPGs with a Population of 10,000+ Living in North America, Joshua Project

If the missiological community has given priority to such peoples across the globe, then the question should be asked: What is being done to reach and plant churches among these peoples here? Though I do not have any definitive research to support my assumption, my initial reaction is that very little is being done by the North American Church to reach these people in our backyard. Why does the Church travel to the ends of the earth and spend vast amounts of resources to attempt to reach the unreached in dangerous and creative access nations, but yet will not simply walk out Her back door to their front doors and love them? Though we *absolutely must* continue to give, go, and send missionaries to these peoples across the world, even to the dangerous areas, it is both strategically foolish and biblically sinful to neglect those whom the Lord has sent to us. This is not an "either/or" matter; it is a "both/and" matter. What we do "over there" will be more strategic and efficient, and likely more effective, if we include in those strategies what we do "over here." Strategic integration is the key.

North American People Groups Who Have Been Removed from the UPG Listings

In the course of my research, I began to notice a reoccurring matter that though possibly missiologically accurate is potentially strategically problematic. In my search of UPGs, I recognized that there were certain UPGs who lost their UPGs status/ranking whenever their populations showed up in North America (See Appendices 3 and 4).

Joshua Project has a listing of 189 such people groups and Global Research 133 people groups. For example, according to Joshua Project, the Japanese are designated as a UPG if they are residing in Japan, Italy, Germany, Russia, and several other nations. However,

if they are located in the United States, they are no longer considered a UPG (progress ranking of 1.2), but rather a reached people group, with a progress ranking of 3.2 (evangelicals >5% and an accelerating rate of new fellowships. See Table 2). 12

Most missiologists designate a people a UPG if the evangelical population is 2% or less (for the slight differences between Global Research and Joshua Project, see Figures 1 and 2). If Joshua Project's data is correct, then missiologically speaking the Japanese living in the United States have an evangelical population that would rightly remove them from the UPG listing. However, if I *only* look at the UPG listing of those residing in North America, seeing a group as "reached" is not likely to cause me to consider asking whether they are "unreached" in other nations.

Joshua Project (and Global Research) is right to remove certain groups based on their geography, but somehow such groups need to be "flagged" to inform researchers and missiologists of their global status. I fear that in light of believing that the people is reached in North America, we will fail to see the *enormous* potential in equipping such people groups to return to their peoples (as missionaries) who remain on the UPGs list.

Depending on the situation, such peoples already will have dual citizenship, a working knowledge of their mother tongue, cultural familiarity, and a valid passport to return to their countries. The North American Church faces a wonderful opportunity to enter into partnerships with such peoples who have the potential to travel faster and farther with the gospel doing E-1 church planting, than missionaries who by their nature

¹²It should be noted that discussion of this shifting in status because of geography has been discussed. Patrick Johnstone discusses elements of this matter and the need for global strategies in the article "Affinity Blocs and People Clusters: An Approach Toward Strategic Insight and Mission Partnership," *Mission Frontiers* 29 #2 (March-April, 2007): 8-15. For the on-line version, see http://www.missionfrontiers.org/2007/02/PDFs/08-15%20Blocs,%20Clusters,%20Peoples.pdf; Accessed 3/13/08.

would be faced with E-2 and E-3 church planting in foreign lands. Again, it is not an "either/or" matter, but rather a "both/and" strategy. E-2 and E-3 church planting are absolutely necessary, but a biblical missiology for the North American Church recognizes the potential at hand and calls us to strategize accordingly. We must live by the motto of Zinzendorf and Wesley: "The world is our parish."

The X-Factors of the United States and Canada

One of the most surprising observations from my research is the fact that hundreds of people groups living in North America, including many who have been clearly identified as UPGs outside of North America, have an evangelical status as "Unknown." Because of this fact, I believe the actual numbers of UPGs in North America greatly exceed the present numbers of known UPGs as listed by Joshua Project (113 UPGs) and Global Research (240 UPGs).

Joshua Project records as "unknown" 231 people groups in North America while Global Research lists a much larger number of 794 "unknown" people groups (see Appendices 5 and 6). Though the number of groups and their populations differ between Joshua Project and Global Research, one matter is absolutely clear: we are ignorant as to what is going on in our backyards. It is amazing that we can travel across land and sea and develop fairly accurate understandings of the UPGs living in some of the most hostile environments of the world, but we have little understanding of what is going on among the world's peoples in our safe and secure hometowns. What is even more baffling, is the fact that the nations listed with the greatest number of people groups with an "unknown" Evangelical status are Canada and the United States, two of the most highly studied, developed, churched, educated, and resourced nations in the world.

The cover of the January-February 2008 edition of *Mission Frontiers* declares "God cannot lead you on the basis of information you do not have." Though I do not believe that God's leadership in our lives is limited to our knowledge, there is some truth in this statement. God generally guides His people based on their understandings of reality. For example, Joseph knew that a famine was coming in Egypt so he stockpiled food; Joshua sent spies to scout out the land; Gideon's courage was strengthened when he overheard the interpretation of the Midianite's dream about the barley loaf; and Nehemiah was moved to rebuild the wall based on a report he hear about Jerusalem. Indeed, God has used and uses knowledge about our realities to guide us for His glory. May the North American Church be moved to understand better the peoples living here and be more global in our missional thinking and strategizing.

Conclusion

Not only have the nations of the world come to North America, but also many of those nations are some of the least reached in the entire world. Unfortunately, the North America Church has not taken the time to understand those peoples, evangelize and plant churches among those peoples, and partner with those who are believers to return as missionaries to the UPGs of the world. The time is ripe for the Church to recognize the need and the global missionary potential found among the peoples living in North America. We must continue to send cross-cultural missionaries to the UPGs of the world; this is missions through the front-door. However, we are unwise stewards if we fail to respond to the need in our backyard. It is here we can reach into the majority world by doing E-2 and E-3 evangelism and church planting; this is missions through the back door.
